MONONGAHELA VALLEY FEELS THE EFFECT OF CONGESTION

Unusually Heavy Railroad Traffic Presents Difficulties to Dispatchers

EMBARGOES ON IN THE EAST

St. George Port at New York Opened For Three Days This Week—Foggy Mornings of Late Cause of Passenger Delays.

With embargoes on freight in eastern points and freight traveling like the historical snail, the Monongahela valley is offering evidences of congestion and a slight hesitation in the operation of trains. However there is reason to believe that the situation is generally bettering, considering the unusually heavy trains which jam the Monongahela division lines from Pittsburg south as far as Brownsville. Coal and coke shipments with other freight are proving heavy and there is as rapid a return of cars as possible.

At times there seems an almost unbroken string of long coal trains from Pittsburg out, empties traveling south and loaded cars going north. Due to the heavy traffic some passenger trains have been compelled to a lose a little time between some stops, but generally speaking the railroad dispatchers on the Monongahela division have shown woderful resources and ability in keeping things moving. Foggy mornings of late have proven discouraging and help back trains somewhat.

In the east railroads are apparently making little progress in relieving the congestion of coal which exists at the seaboard. Baltimore is the latest port to go under the ban. One bright spot for the coal shippers has been the partial suspension of the embargo against St. George, which was lifted for three days this week, but goes on tight tonight. All of the New York ports are under embargo now with the exception of St. George. Locally this embargo has not had the serious effect it has had elsewhere, since coal from this section is usually consigned elsewhere. Western shipments are being maintained in good shape.

Eight Per Cent of Business Houses Equipped and 33 Per Cent of Homes

REPORT MADE AT WASHINGTON

Free mail delivery service is furnished to 2,308 business houses and homes in Charleroi from the Charleroi postoffice, according to a report which Postmaster J. K. Smith has compiled and is sending to the postal department at Washington, D. C. Eight per cent of the business places have mail receptacles and 33 per cent of the homes are equipped with boxes.

There are 315 business houses to which mail is delivered by carriers. Homes to which delivery is made number 1,993. In addition there are a large number of boxes from which individuals secure their mail.

The feature of the report of Postmaster Smith is that of the lack of boxes at business houses and homes. Just what the government will do with the report once it receives it is not known. Requests were made some time ago that boxes be placed everywhere for mail.

CHALLENGE FOR MEET IS ISSUED

Charleroi High School Literary Societies Seek Match With Donora

DETAILS TO BE ARRANGED

A challenge to the Donora high school for a literary contest similar to the first one held in Charleroi last spring has been issued by the Charleroi high school literary societies, and acceptance is being awaited. It is understood that Donora will agree to contest to be staged there within six weeks or two months.

In the first meeting between the two schools in Charleroi last April Charleroi claimed a victory. The contest developed some splendid talent in both schools. A program consisting of essays, orations and a debate was carried out.

Superintendent Reed of the Donora schools practically accepted the chalenge, and probably arrangement of details will begin soon.

Deed Recorded.

January 21, 1916—Ruffin Godvriend et ux to John W. Cornell, Charleroi, a lot in Lock Four Extension plan, Fallowfield township; consideration $1.

Most of Teachers Back, Though Number of Pupils Still Remain Out

COLDER WEATHER EXPECTED

Jaundice Now Feared—Outbreak of Disease in Western City Causes Much Suffering and Precautions Are Being Taken Here.

The health of the borough schools is improving at this writing, as the ruralite who "writes for the paper" would put it. As a consequence Superintendent T. L. Pollock of the Charleroi schools is not experiencing the difficulties he faced several days ago of providing for teachers. Pupils absent on account of illness though are still numerous, though the absentees are now slightly less than 500 in all grades.

Apparently there is considerable less grip and pneumonia now raging in Charleroi and other towns of the Monongahela valley than there has been for weeks. Whether this is because the favorite diseases of the season have made their complete rounds or for some other reason is a question, but schools, industrial concerns and transportation systems which felt the detrimental effect are beginning to note a betterment.

The weather of the last few days has been unusual and such as to re-establish grip and encourage colds. Yet the sunshine driving out the dingy fog of early morning has served as a preventative.

The weather man is none too kind in his predictions for the weather today and tomorrow. It will rain today and probably tomorrow, he states and colder weather may be expected.

One thing that is now feared is an epidemic of jaundice. This is the effect that has been noticed in Detroit, among other cities, and thousands there are suffering from the ailment. Precautions are being taken locally.

PREVENTION OF FIRE

State Fire Marshal Baldwin has instituted a movement of Fire Prevention Association in every community in Pennsylvania. In a bulletin recently issued he outlines the plan as follows:

"Have you heard this cry on a cold winter's night and responding to the call found that a neighbor's home was burning and the family hemmed in and in danger of losing their lives? You perhaps helped to get them out or may be one or two lives were sacrificed. To what? Carelessness probably or putting off until tomorrow what should have been done at once. Did you after the fire look for the cause and find that a lot of useless trash or useless articles had been piled in the cellar, attic, or closets and that the fire had from some cause, started amongst this trash or waste? Was it a lesson to you? Did you go home and look around and see if the same conditions existed in your own home and did you at once start a clean-up crusade or did you let well enough alone and invite fire on your own premises? Possibly a fire occurs in your own home from some such cause. Was it a warning to you and did you heed it? Did you clean up and keep the place free from accumulation of fire breeding material?

"Perhaps your house that you struggled and saved to build may have been destroyed by a fire that started in your neighbor's place and from the same cause (carelessness), and you have been skimping and depriving yourself of necessities and pleasures to rebuild. Have you not felt aggrieved at that neighbor who permitted such conditions to exist that they jeopardized your property and don't you believe that where such a fire occurs that the neighbor should be held responsible for the damage done to your property? That is what is done in European countries and the result of such a law is that the fire loss is ten times less than in this country. Why not at once start a movement of that kind in your community and invite the members of the legislature to pass a law for the entire state? It would be a great thing for the state and the community in which you live, placing the responsibility on each citizen to see that his premises is kept free from fire hazards and if the responsibility for a loss (when caused by a neighbor's neglect or carelessness) becomes a law there will be active interest in fire prevention and the removal of all the causes of fire. Look into this and get busy as it is of great interest to you and particularly so if you have labored the best part of a life time to build your home.

"Get together, forma Fire Prevention Association amongst your neighbors. Let your motto be "Clean and Keep Clean." Se that your buildings are in good repair and keep them so: and the fire hazards will be materially reduced."

That Donora painter who fell 125 feet and lived to tell the tale may well consider himself especially favored of providence, since he is the one in a thousand. We have heard of expert river divers taking a chance by a daring leap from the loftiest point of the highest bridges and living to hear the tumultuous applause, but diving at solid clay is another thing. It ordinarily would not be a good thing to practice.

An interesting comparison is furnished by the manner in which the Charleroi-Monessen hospital was started and the manner in which the Brownsville General hospital is being started. In Charleroi and contiguous territory, hospital up-building has been slow and tedious, with nothing to guarantee its success. Not even the building could be called the institution's own so heavy was the debt from the first. But at Brownsville the hospital work will begin in a new and costly institution of the most up-to-date character, with substantial backing to guarantee its success financially. Both hospitals of course command state aid. The difference is in their inception, one being an institution that time only has established and the other an institution established before it has a patient. But in point of usefulness to the communities represented there would be practically no difference and after all it is the usefulness of an institution of this beneficient nature that counts the most.

After all this undesirable, unreasonable weather more grip and pneumonia may be expected, with an accompanying loss of life. But there is nothing the human race can do save observe common health rules and in justice to itself it surely ought to do this.

Philathea class of the Washington Avenue church will hold a bake sale at Wilson's Undertaking rooms Saturday February 5. 190-t2

An old miner once visited a lawyer to make his will. The old man's property consisted of two small cottages, which had cost him $400. The lawyer asked him how he wished to dispose of it.

"Ma ould woman is to hev it so long as she's ma widow."

"What age is your wife?" asked the lawyer.

"Seventy-two," was the reply.

"And how long have you been married?" was the next question.

"Over fifty years," was the reply.

The lawyer suggested that under the circumstances he should let his wife have the little property during her life, whether she remained a widow or not.

"Aa winnot!Aa winnot!" exclaimed the old man. "Aa'll hev me aanway."

"But surely," expostulated the lawyer, "you don't expect an old woman now over 72 would ever dream of marrying again?"

The miner looked the lawyer full in the face and answered, very solemnly:

"Well, sonny, there's no knowing what young chaps like yourself will dae for money."—Boston Herald.

A very small boy was taken to a dental establishment to have some of of his first teeth pulled. For a second or so during which time four teeth disappeared, everything was fairly serene and then came howls of objections.

"I didn't want them teeth to come out!" cried the young patient, suddenly recollecting something. "I want them to stay in."

"That's all right," consolingly responded the dentist. They will soon grow in again."

"Will they?" quickly rejoined the boy with a brightening face. "Do you think they will grow in time for dinner?"—Philadelphia Telegraph.

FOR BRONCHITIS, SEVERE COUGHS COLDS AND WHOOPING COUGH

Make the Best Medicine at Home— 128 Teaspoonsful for 50 Cents

Money spent for the old style ready-made medicine usually sold in bottles holding only 2 to 2½ ounces (16 to 20 teaspoonsful) is largely wasted, because most of them are composed principally of sugar and water. Yet you have to pay the same price as if it were all medicine. Stop wasting this money. You can make a better remedy for bronchial affections, at home at one-fifth the cost. Merely go to Piper's pharmacy and ask for 2 ounces (50c worth) of Schiffman's New Concentrated Expectorant, which they guarantee will give perfect satisfaction or money will be refunded. Mix this with one pint of granulated sugar and one-half pint of boiling water, which makes a full pint (128 teaspoonsful.) This new, simple, pleasant remedy is guaranteed to relieve the worst cough or cold, Bronchial Asthma, Bronchitis, Croup, Hoarseness and Whooping Cough. One bottle will make enough home-made medicine to probably last the whole family the entire winter. Children like it, it is so pleasant to take. It is unlike any other medicine, and positively contains no chloroform, opium, morphine or other narcotics, as do most cough mixtures. Keep it on hand in case of emergency and stop each cough before it gets a firm hold. The above druggist, in fact any druggist in this city, will return the money (just the same as is done with Schiffman's famous Asthmador) in every single case where it does not give perfect satisfaction or is not foun dthe best remedy ever used. Absolutely no risk is run in buying this remedy—under this positive guarantee.

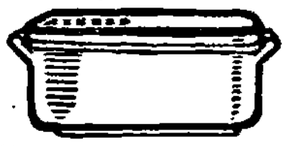
ATLANTIC
Rayolight OIL

~in the
wash boiler



~and
the clothes are really WHITE

A QUARTER of a cup of **Atlantic Rayolight Oil** in the wash boiler and the white things will wash real white. And without a bit of back-breaking, Blue-Monday, washboard rubbing. But the use of **Atlantic Rayolight Oil** doesn't end with wash day nor with heating and lighting.

Hundreds and hundreds of women, practical, economical housewives, have written us that they simply couldn't do without it; use it every day in their housework, find it the finest thing to polish windows, to keep their sewing machines running smoothly, to clean painted surfaces and for heaps of other purposes.

But these same women buy **Atlantic Rayolight Oil** by name. They can't afford to take a chance on the nameless, unknown kerosene—their white things are too precious to trust to anything but the best, the finest kerosene and that they know is

ATLANTIC
Rayolight OIL

It burns without smoke or smell, but with a clear, mellow, white light; burns slowly, too. It never varies in quality and so always produces identical results.

But with all these advantages, **Atlantic Rayolight Oil** costs no more than the unknown, nameless kerosene.

CHRISTIAN ENDEAVORS MEET AT COUNTY SEAT

People From All Parts of County Gather to Attend Banquet and Hear Officer of United Societies Make Temperance Address.

Nearly 150 Christian Endeavor workers from all parts of Washington county gathered at the Third Presbyterian church at Washington Wednesday night to hear an able temperance talk given by Daniel A. Poling, associate president of the United society. It was an enthusiastic but attentive audience.

A reception was tendered Mr. Poling and immediately after this a banquet was served in the dining room of the church by the Third Presbyterian Christian Endeavor society. Exactly 125 were present at the function. Dr. Matthew Rutherford was toastmaster. Responses were made by Judge J. A. McIlvaine, Washington; Edward Croft, Canonsburg; Rev. Mr. Fulton, Canonsburg; Miss Ora Work, Washington, and Charles A. Fisher, Washington, president of the Washington County Christian Endeavor union.

The principal address at the banquet was given by H. B. McCrory, state secretary. He outlined work being done by Christian Endeavors and their aims as to the future.

Mr. Poling spoke on temperance. He described the harm of alcholic drinks to the physical body; how it injured society; reviewed the results of campaigns in states that have gone dry and in conclusion pointed out to the Christian Endeavorers how important a part they could play in advancing the cause. His subject was "The Grip That Holds."

Washington county before July 1917 is to have 50 expert Christian Endeavorers and diplomas were presented by Mr. Poling to a class of 27 that had passed the required examination. A number of Charleroi people attended the affair.

joy just hangs on every puff

How a pipe of "Tux" does bubble over with good cheer and sunny comfort! There's something about the mellow taste of "Tux" that stirs a smoker's soul. It gets into his inside works, sweetens his disposition, and gives him that perky, chesty feeling, like a high-stepper trotting down the avenue.

Tuxedo

The Perfect Tobacco for Pipe and Cigarette

Men who never smoked a pipe before are now smoking Tuxedo, because they have found that Tuxedo is the mildest tobacco made, and that it is the one tobacco that never irritates mouth, throat or nerves.

JUDGE DANIEL C. DEASY
Supreme Bench,
San Francisco, Cal.

"I get a heap of pleasure out of Tuxedo, the sweetest, coolest, most delightful pipe tobacco I've ever smoked."

You simply *cannot* get another tobacco made by the "Tuxedo Process"—and that's the original of all processes for removing every trace of harshness and bite from the tobacco. It has been widely imitated, but never duplicated.

Try Tuxedo for a week, and you'll get acquainted with the sweetest, mildest, mellowest smoke in the world.
